REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The subject matter of the independent claims could either not be found or was not suggested in the prior art of record. In reference to independent claims 1 and 21 the subject matter not found was a guide catheter system having a flexible shaft, handle assembly coupled to the flexible shaft, wherein the handle assembly has a guide member attached to the shaft and housing movably coupled to the guide member via a multiple-slot and pin arrangement comprising a serpentine slot provided on either the guide member or the housing and a pin respectively provided on the housing or the guide member. The serpentine slot and pin arrangement allows the shaft to be selectively movable between a plurality of discrete positions of a first degree of freedom being either longitudinal position or rotational positions defined relative to the shaft while restraining motion in a second degree of freedom respectively being either rotation motion or longitudinal motion at each discrete position of the first degree of freedom, and the shaft being movable through a displacement of a second degree of freedom at each discrete position via the serpentine slot and pin so that the distal end of the flexible shaft moves in a controlled sweeping serpentine motion resulting from the restricted movement from the serpentine slot and pin.
3. In reference to independent claim 18, see the discussion of "Reasons for Indication of Allowable Subject Matter" in paragraph 14-15 in the Final Rejection Office Action mailed on 2/28/2007.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
